Calcimax 600

Nutrition vs. Therapy

CALCIMAX- 600 TRUE CALCIUM THERAPY

- 600 mg Elemental Calcium
- Meets clinical guideline needs for bone health
- Protects maternal bone mass

why multivitamins / general supplement dosage is far below the required daily amount?

- Contains small calcium doses (100-250mg)
- Not sufficient osteoporosis management
- Supportive only, not therapeutic

When calcium is truly needed,
Prescribe **Calcimax- 600**
the Real Therapy Beyond Multivitamins.

Calcimax 600

Calcimax *Plus*

DAILY RECOMMENDED CALCIUM INTAKE DURING PREGNANCY

For the prevention of pre-eclampsia

WHO (World Health Organization):
1,500-2,000 mg/day

WHO - RDA
1200-1300 mg/day

WHY MULTIVITAMINS AREN'T ENOUGH

Most provide only 100-250 mg elemental calcium
calcimax plus - the real therapy beyond multivitamin

CALCIMAX PLUS - TRUE CALCIUM THERAPY

- * Meets clinical guideline needs for pregnancy & bone health
- * Reduced risk of preeclampsia & growth restriction

Calcimax *plus*
STRENGTH TWO GENERATIONS

Calcimax *Plus*
